

First announcement and call for papers
The Swedish Society for Materials Technology
announces a conference on

Modern Methods for Quantitative Metallography

Stockholm, 5-6 November 2003

The conference topics will include:

- Advances in Stereology
- Variety and quality in image acquisition
- Advanced image processing + measurement
- Applications and prediction of material properties

The conference programme will include a mixture of invited presentations and contributed research papers. Papers at the conference will be presented orally. It is also intended to publish the proceedings as a collected volume in the Scandinavian Journal of Metallurgy.

If you would like to be kept informed of developments regarding this conference please reply with the following information:

Name:
Address:
.....
email
.....

I wish to:

- receive coming announcements [] (please tick)
- submit a paper for presentation [] (please tick)

Titles for submitted papers, accompanied by a short abstract, must be sent by 15th August at the latest. All replies should be sent to:
